

Centrum Elektroniki Stosowanej CES Sp. z o.o.

<http://ces.com.pl>

Bilateral Meetings

- (10:00 am - 4:00 pm)

Description

Centrum Elektroniki Stosowanej with multiple partners combine the knowledge and experience to deliver industrial installations for the preparation and use of biogas/ natural gas for energy purposes. Our offer is based on several years of activity in the sector of renewable energy sources. We have extensive references in the field of cogeneration, treatment, compression of biogas, gas analysis as well as the metering of these installations. Installations are made by using the existing infrastructure and equipment. We do not promote the use of a single technology but always adapt the technology and process to meet the needs of customers. We value simplicity combined with efficiency solutions. The scope of our work is designing and the delivery of biogas plants for sewage treatment, landfills, biogas plants and all the exploiters of combustible gases. All interested are welcome to cooperate.
